

## **Rescue Bunny Food**

- 1 part of regular rabbit pellets (I use the V-8 can as measure)
- 1 part old fashioned oatmeal
- 1 part canned 100% pumpkin
- 1 part original V-8 juice (I use the 5.5 ounce size)

Mix all well and serve to bunnies. I also take a bit around as a treat to my healthy rabbits, so they look at it as a treat. I find that they don't care for it much when it is refrigerated, so I only make up what I need, a batch at a time. It's something about the smell that drives them nuts! It will also get them back on their feed, in a lot of cases!
